CLARK STREET / I-15 INTERCHANGE ENHANCEMENT OPEN HOUSE

The City of Pocatello Parks and Recreation Department along with Myers Anderson Architects, invites you to join us to provide input towards the proposed design approach, elements and features for this project. We solicit your comments on the landscape enhancement portion of the Clark Street / I-15 Interchange project. This is being funded with enhancement money from the State, and will be maintained by the City.

Myers Anderson has been retained to provide the landscape design for this location. Clark Street Interchange is a highly visible premier location where we as a community can help to create a unique identity for Pocatello. The City would like to establish a design model that could be implemented in the future beautification of other entrances to Pocatello.

Through landscape design we can express a positive community image, while being mindful of our environment, taking advantage of native vegetation and geology, and welcome our visitors with pride. Our goal is to create an inspired design, while being sensitive to the maintenance and resource costs for this location.

Open House: November 13, 2007

Time: 3:00 pm – 7:00 pm

Location: Marriot Towne Place Suites Lobby, 2376 Via Caporatti Drive, Pocatello 478-7000

Contact: Myers Anderson Architects, PLLC
